Sample Report Preview

Your Fit Profile

Weekly Hours: 6-10 hours
Tech Comfort: Developer
Support Tolerance: Low - async email only
Revenue Goal: $2-5k/mo (ramen profitable)
Build Style: Solo + AI assistants
Risk Tolerance: Medium - build quick MVP

Your #1 Match: Tab Sweeper for Work Sessions

87% Match - Chrome extension utility

A Chrome extension that auto-groups and hibernates tabs by project with one-click restore. It shows a simple weekly 'time saved' dashboard so users feel the payoff.

The Wedge

Unlike heavy tab managers, it's one-button 'clean my session' with zero setup and a weekly savings score that makes the habit stick.

Competitor Analysis

The Great Suspender Free
Gap: No 'session sweep' + no savings feedback loop

OneTab Free
Gap: Batch list only; no auto-group + no restore UX

Workona $7+/mo
Gap: Too heavy; setup friction for casual users

MVP Specification

In Scope:
  - One-click sweep
  - Auto-group by domain
  - Hibernation
  - Restore last 3 sessions
  - Weekly time-saved estimate

Out of Scope:
  - Team features

- Cross-device sync
- AI categorization

Full report includes:
